Defense Layer	Control Implemented	Purpose / Justification
Perimeter	ACL-DMZ filtering external traffic	Blocks unwanted inbound access to DMZ
Network	Subnets for DMZ (192.168.10.0/24) and Internal (192.168.20.0/24)	Limits lateral movement between zones
Host	Local firewall enabled on PC-Admin and FileServer	Prevents unauthorized inbound connections
Application	WebServer only exposes HTTP	Reduces attack surface in DMZ
Data	FileServer isolated inside Internal LAN	Sensitive data stored away from public-facing segments
